This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Implantation of the Subcutaneous Implantable Cardioverter-Defibrillator with Truncal Plane Blocks

Marc A. Miller, MD*¹; Himani V. Bhatt, DO, MPA*²; Menachem Weiner, MD²; Tom F. Brouwer, MD¹;
Alexander J. Mittnacht, MD²; Ali Shariat, MD²; Christina Jeng, MD²; Caroline Eden, BA²; Hung-Mo Lin,
PhD²; Benjamin Salter, DO²; Srinivas R. Dukkupati, MD¹; Vivek Y. Reddy, MD¹

¹Helmley Electrophysiology Center in the Department of Cardiology and the ²Department of
Anesthesiology, Icahn School of Medicine at Mount Sinai, New York, New York

*Both authors contributed equally to the manuscript

Short Title: Subcutaneous ICD with Regional Anesthesia

Key Words: subcutaneous implantable cardioverter-defibrillator, serratus anterior plane block, fascial
plane block, truncal block, analgesia, ultrasound

Word Count: 2,073

Disclosures: Dr. Miller has received grant support from Boston Scientific, the manufacturer of the
subcutaneous ICD. Dr. Reddy has received grant support and consulting honorarium from Boston
Scientific. This research did not receive any specific grant from funding agencies in the public,
commercial, or not-for-profit sectors.
