This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**The Evaluation of Shortness of Breath after Atrial Fibrillation Ablation – Is There A
Stiff Left Atrium?**

Yogesh N. V. Reddy MD, Abdallah El-Sabbagh MD, Douglas Packer MD and Rick A
Nishimura MD

Department of Cardiovascular Diseases, Mayo Clinic, Rochester, MN

Running title: Evaluation of dyspnea after AF ablation

Funding: YNR is supported by NHLBI grant T32 HL007111

Word count: 2979

Keywords: Stiff left atrial syndrome, Atrial fibrillation Ablation

Conflict of interest: None
