This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title

Absence of Rotational Activity Detected Using Two-Dimensional Phase Mapping In Corresponding Three-Dimensional Phase Maps In Human Persistent Atrial Fibrillation.

Running Title

Absence Of 2D Phase Detected Rotors In 3D Phase Maps
