This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Systemic Infection Due to Subcutaneous
Implantable Cardioverter-Defibrillator Implantation:
Importance of Early Recognition and Treatment of Device Pocket-Related Complications**

Patrick M. Looser MD, Layth Saleh MD, George Thomas MD,
and Jim W. Cheung MD FHRS

From the Department of Medicine, Division of Cardiology
Weill Cornell Medical College, New York, NY 10021

Short title: Systemic Infection and Subcutaneous ICDs

Disclosures

Dr. Cheung has received speaker honoraria from Biotronik and Medtronic, research grant support from Biotronik, and fellowship grant support from Biotronik, Boston Scientific and Medtronic. Dr. Thomas has received research grant support from Biotronik. The other authors have no disclosures.
