QRS dispersion better than QRS duration for predicting response to cardiac resynchronization therapy

Elibet Chávez-González, MD, PhD; Francisco L. Moreno-Martínez, MD, MSc

PII: S1109-9666(16)30283-4

DOI: [10.1016/j.hjc.2016.11.002](https://doi.org/10.1016/j.hjc.2016.11.002)

Reference: HJC 64

To appear in: *Hellenic Journal of Cardiology*

Received Date: 20 December 2015

Accepted Date: 19 March 2016

Please cite this article as: Chávez-González E, Moreno-Martínez FL, QRS dispersion better than QRS duration for predicting response to cardiac resynchronization therapy, *Hellenic Journal of Cardiology* (2016), doi: 10.1016/j.hjc.2016.11.002.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

LETTER TO THE EDITOR

**QRS dispersion better than QRS duration for predicting response to cardiac
resynchronization therapy**

Running title: **QRS dispersion predicts response to CRT**

Elibet Chávez-González, MD, PhD; and Francisco L. Moreno-Martínez, MD, MSc
