## Accepted Manuscript

Different modalities of exercise improve macrovascular function but not microvascular function in metabolic syndrome: The RESOLVE randomized trial

Agnès Vinet, Philippe Obert, Daniel Courteix, Robert Chapier, Bruno Lesourd, Julien Verney, Frédéric Dutheil, Guillaume Walther

PII:	80167-5273(18)31164-1
DOI:	doi:10.1016/j.ijcard.2018.05.073
Reference:	IJCA 26486
To appear in:	
Received date:	21 February 2018
Revised date:	7 May 2018
Accepted date:	21 May 2018

Please cite this article as: Agnès Vinet, Philippe Obert, Daniel Courteix, Robert Chapier, Bruno Lesourd, Julien Verney, Frédéric Dutheil, Guillaume Walther, Different modalities of exercise improve macrovascular function but not microvascular function in metabolic syndrome: The RESOLVE randomized trial. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Ijca(2017), doi:10.1016/j.ijcard.2018.05.073

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
