This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Genetic predictors of testosterone and their associations with cardiovascular disease and risk factors: a Mendelian randomization investigation

C Mary Schooling PhD ^{1,2†}, Shan Luo MSc^{1†}, Shiu Lun Au Yeung PhD¹, Deborah J Thompson PhD ³, Savita Karthikeyan MSc ⁴, Thomas R Bolton MSc ⁴, Amy M Mason PhD ⁴, Erik Ingelsson MD PhD ⁵, Stephen Burgess PhD ^{4,6,7*}

All authors take responsibility for all aspects of the reliability and freedom from bias of the data presented and their discussed interpretation.

† Equal contribution, * Corresponding author. Address: Strangeways Research Laboratory, 2 Worts Causeway, Cambridge, CB1 8RN, UK. Email: sb452@medschl.cam.ac.uk. Phone: +44 1223 748651. No fax number (please email instead).

Sources of funding: No specific funding was received for the writing of this manuscript. Stephen Burgess is supported by a Sir Henry Dale Fellowship jointly funded by the Wellcome Trust and the Royal Society (Grant Number 204623/Z/16/Z). This work was partly supported by a small project fund (#201409176231) from the University of Hong Kong.

Disclosures: Erik Ingelsson is an advisor and consultant for Precision Wellness, Inc., and advisor for Cellink for work unrelated to the present study. There are no conflicts of interest relating to this manuscript.

Keywords: testosterone; sex hormones; Mendelian randomization; causal inference; genetic epidemiology; disease aetiology.
