Association of positive well-being with reduced cardiac repolarization abnormalities in the First National Health and Nutrition Examination Survey

Nino Isakadze, Elsayed Z. Soliman, Viola Vaccarino, William Whang, Rachel Lampert, J. Douglas Bremner, Amit J. Shah

PII: S0167-5273(17)32384-7
DOI: doi:[10.1016/j.ijcard.2018.04.135](https://doi.org/10.1016/j.ijcard.2018.04.135)
Reference: IJCA 26408

To appear in:

Received date: 19 April 2017
Revised date: 2 February 2018
Accepted date: 30 April 2018

Please cite this article as: Nino Isakadze, Elsayed Z. Soliman, Viola Vaccarino, William Whang, Rachel Lampert, J. Douglas Bremner, Amit J. Shah , Association of positive well-being with reduced cardiac repolarization abnormalities in the First National Health and Nutrition Examination Survey. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Ijca*(2017), doi:[10.1016/j.ijcard.2018.04.135](https://doi.org/10.1016/j.ijcard.2018.04.135)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Association of Positive Well-Being with Reduced Cardiac Repolarization Abnormalities in the First National Health and Nutrition Examination Survey

Short title: Association of Psychological Well Being and Cardiac Repolarization
