This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

HIGH INTENSITY INTERVAL TRAINING VERSUS MODERATE INTENSITY  
CONTINUOUS TRAINING ON EXERCISE CAPACITY AND QUALITY OF LIFE IN  
PATIENTS WITH HEART FAILURE WITH REDUCED EJECTION FRACTION: A  
SYSTEMATIC REVIEW AND META-ANALYSIS

Short title: exercise in heart failure
