This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title

Monocyte-to-high density lipoprotein ratio (MHR) can predict the significance of angiographically intermediate coronary lesions

Authors

Ahmet Korkmaz¹, MD; Mevlut Demir¹, MD; Sefa Unal², MD; Abdulkadir Yildiz³, MD; Burcu Ozyazgan¹, MD; Bekir Demirtas¹, MD; Ozgul Ucar Elalmis¹, MD; Mehmet Ileri¹, MD; Umit Guray¹, MD.
