JACC: CARDIOVASCULAR INTERVENTIONS CME/MOC

This article has been selected as this issue's CME/MOC activity, available online at http://www.acc.org/jacc-journals-cme by selecting the JACC Journals CME/MOC tab.

Accreditation and Designation Statement

The American College of Cardiology Foundation (ACCF) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The ACCF designates this Journal-based CME/MOC activity for a maximum of 1 AMA PRA Category 1 Credit(s). Physicians should only claim credit commensurate with the extent of their participation in the activity.

Method of Participation and Receipt of CME/MOC Certificate

To obtain credit for this CME/MOC activity, you must:

 Be an ACC member or JACC: Cardiovascular Interventions subscriber.

- Carefully read the CME/MOC-designated article available online and in this issue of the journal.
- Answer the post-test questions. At least 2 out of the 3 questions provided must be answered correctly to obtain CME/MOC credit.
- 4. Complete a brief evaluation.
- Claim your CME/MOC credit and receive your certificate electronically by following the instructions given at the conclusion of the activity.

CME/MOC Objective for This Article: At the end of the activity the reader should be able to: 1) understand the differences of currently available physiologic indices; 2) recognize the safety of deferred patients with physiology-guided decision-making; and 3) compare the results in the present study to previous trials.

CME/MOC Editor Disclosure: *JACC: Cardiovascular Interventions* CME/MOC Editor Bill Gogas, MD, PhD, has reported that he has no disclosures.

Author Disclosures: DEFINE-FLAIR and iFR-SWEDEHEART were supported by unrestricted educational grants from Philips

(formerly Volcano) to Imperial College Trials Unit and Upsala Clinical Research Centre, respectively. This trial received no additional funding. Dr. Escaned is a speaker and consultant for Abbott, Boston Scientific, and Philips, and received personal fees from Philips Volcano, Boston Scientific, and Abbott/St. Jude Medical outside the submitted work. Dr. Al-Lamee has received personal fees from Philips Volcano outside the submitted work. Dr. Baptista has received grants and personal fees from St. Jude Medical and Boston Scientific outside the submitted work. Dr. Cook has received personal fees from Philips Volcano outside the submitted work. Dr. Davies has received grants and personal fees from Volcano and Imperial College during the conduct of the study; has received grants and personal fees from Medtronic and ReCor Medical; and has received grants from AstraZeneca outside the submitted work. In addition, Dr. Davies has patents WO2011110817 A2, US9339348 B2, WO2015013134 A3, EP3021741 A2, and US20150025330 A1, issued to Imperial College and licensed to Volcano. Dr. Buller is a consultant to Philips Volcano. Dr. Di Mario has received personal fees from Philips Volcano outside the submitted work. Dr. Götberg has received grant support from Volcano during the conduct of the study; and personal fees from Volcano, Boston Scientific, and Medtronic outside the submitted work. Dr. Härle has received nonfinancial support from Volcano outside the submitted work. Dr. Jeremias has received personal fees from St. Jude Medical and Philips Volcano outside the submitted work. Dr. Khashaba has received support from Volcano during the conduct of the study. Dr. Kikuta has received personal fees from Philips Volcano during the conduct of the study. Dr. Laine has received grants from Imperial College London during the conduct of the study. Dr. Maeng has received grant support from Volcano during the conduct of the study. Dr. Nijjer has received grants from the Medical Research Council; and personal fees and nonfinancial support from Volcano during the conduct of the study. Dr. Omerovic has received grant support and personal fees from AstraZeneca; and grant support from Abbott outside the submitted work. Dr. Patel has received grants and personal fees from Volcano during the conduct of the study; grants and personal fees from AstraZeneca and Janssen; and personal fees from Bayer outside the submitted work. Dr. Petraco has received personal fees from Philips Volcano outside the submitted work. Dr. Piek has received grants and personal fees from Abbott Vascular, Philips Volcano, and Miracor outside the submitted work. Dr. Sandhall has received personal fees from Philips Volcano and Boston Scientific outside the submitted work. Dr. Sen has received grants from Volcano during the conduct of the study; and grants and personal fees from Philips and grants from Medtronic outside the submitted work. Dr. Serruys has received personal fees from Abbott, AstraZeneca, Biotronik, Cardialysis, GLG Research, Medtronic, Sinomedical, Sociéteé Europa Digital & Publishing, Stentys, Svelte, Philips Volcano, St. Jude Medical, Qualimed, and Xeltis outside the submitted work. Dr. Seto has received grants from Volcano during the conduct of the study. Dr. Sharp has received personal fees from Philips Volcano outside the submitted work. Dr. Singh has received personal fees from Volcano during the conduct of the study; and personal fees from Volcano outside the submitted work. Dr. Tanaka has received personal fees from Volcano (Japan), St. Jude Medical, and Boston Scientific outside the submitted work. Dr. Van Belle has received personal fees from Philips Volcano and St. Jude Medical outside the submitted work. Dr. van Royen has received grants and personal fees from Volcano and St. Jude Medical outside the submitted work. Dr. Vinhas has received personal fees from Volcano outside the submitted work. All other authors have reported that they have no relationships relevant to the contents of this paper to disclose.

Medium of Participation: Print (article only); online (article and quiz).
