This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Cardiopulmonary Exercise Measures of Men and Women with HfrEF Differ in their
Relationship to Prognosis: The Henry Ford Hospital CardioPulmonary Exercise Testing (FIT-
CPX) Project

Brief Title: Heart Failure Prognosis of Men and Women

Author Block:

Jonathan K Ehrman, PhD^a

Clinton A Brawner, PhD^a

Ali Shafiq, MD^b

David E Lanfear, MD^a

Matthew Saval, MS^a

Steven J Keteyian, PhD^a

^aHenry Ford Health System, Detroit, MI

^bAurora Health Care, Milwaukee, WI

None of the authors have any conflicts, including those with industry, to report
