The mechanical and hemodynamic effects of left ventricular pacing in heart failure with preserved ejection fraction and left bundle branch block

Daniel J. Friedman, Kasper Emerek, Peter Søgaard, Maryam Vejdani-Jahromi, Joseph Kisslo, Brett D. Atwater

PII: S0022-0736(18)30227-9
DOI: doi:[10.1016/j.jelectrocard.2018.07.004](https://doi.org/10.1016/j.jelectrocard.2018.07.004)
Reference: YJELC 52660
To appear in: *Journal of Electrocardiology*

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The mechanical and hemodynamic effects of left ventricular pacing in heart failure with preserved ejection fraction and left bundle branch block

Daniel J. Friedman, MD^a; Kasper Emerek, MD^{b, c}; Peter Sogaard, MD^b; Maryam Vejdani-Jahromi, MD, PhD^d;
Joseph Kisslo, MD^c; Brett D. Atwater, MD^a

^aDivision of Electrophysiology, Duke University Hospital, Durham, NC

^bDepartment of Cardiology and Clinical Medicine, Aalborg University Hospital, Aalborg, Denmark

^cDivision of Cardiology, Duke University Hospital, Durham, NC

^dDepartment of Biomedical Engineering, Duke University, Durham, NC

Short Title: LV pacing in HFpEF/LBBB

Corresponding Author: Brett D. Atwater, MD. Division of Electrophysiology, Duke University Hospital, 2301 Erwin Road, Durham, NC, 27710. Email: brett.atwater@duke.edu phone: (919) 681-6020, fax: (919) 681-9260

Declaration of Interest: None

Funding source: Dr. Friedman received salary support through the National Institutes of Health T 32 training grant HL069749. The NIH had no role in study design, data collection, analysis, interpretation, writing, or the decision to submit the article for publication.

Key words: Cardiac resynchronization therapy; left bundle branch block; heart failure with preserved ejection fraction
