This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Not all Malignant Pleural Effusions are Created Equal

Central Picture

Central Message

Not all malignant pleural effusions are created equal, but often the trials designed to study them do not sufficiently discern these nuances. We need to stop squeezing patients into preformed molds.

Word Count:500 words
