This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Snakes on a Plan

John Bozinovski MD, MSc.

From the Division of Cardiac Surgery, University of British Columbia and the Royal
Jubilee Hospital, Victoria, British Columbia, Canada.

Central Message

The snake technique to facilitate spinal cord reperfusion should be on the aortic surgeon's
plan as a potential need when performing TAAA replacement surgery.
