Virtual surgical planning, flow simulation and 3D electro-spinning of patient-specific grafts to optimize Fontan hemodynamics

Dominik Siallagan, MS, Yue-Hin Loke, Laura Olivieri, Justin Opfermann, Chin Siang Ong, Diane de Zélicourt, Anastasios Petrou, Marianne Schmid Daners, Vartan Kurtcuoglu, Mirko Meboldt, Kevin Nelson, Luca Vricella, Jed Johnson, Narutoshi Hibino, Axel Krieger

PII: S0022-5223(17)32762-9

DOI: [10.1016/j.jtcvs.2017.11.068](https://doi.org/10.1016/j.jtcvs.2017.11.068)

Reference: YMTC 12309

To appear in: *The Journal of Thoracic and Cardiovascular Surgery*

Received Date: 5 July 2017

Revised Date: 9 November 2017

Accepted Date: 27 November 2017

Please cite this article as: Siallagan D, Loke Y-H, Olivieri L, Opfermann J, Ong CS, de Zélicourt D, Petrou A, Daners MS, Kurtcuoglu V, Meboldt M, Nelson K, Vricella L, Johnson J, Hibino N, Krieger A, Virtual surgical planning, flow simulation and 3D electro-spinning of patient-specific grafts to optimize Fontan hemodynamics, *The Journal of Thoracic and Cardiovascular Surgery* (2018), doi: 10.1016/j.jtcvs.2017.11.068.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Virtual surgical planning, flow simulation and 3D electro-spinning of patient-specific grafts**
2 **to optimize Fontan hemodynamics**

3 Dominik Siallagan, MS^{1,2}, Yue-Hin Loke³, Laura Olivieri^{1,3}, Justin Opfermann¹, Chin Siang
4 Ong⁴, Diane de Zélicourt^{5,6}, Anastasios Petrou², Marianne Schmid Daners², Vartan
5 Kurtcuoglu^{5,6}, Mirko Meboldt², Kevin Nelson⁷, Luca Vricella⁴, Jed Johnson⁷, Narutoshi Hibino⁴,
6 Axel Krieger^{1,8}

15 ⁷ Nanofiber Solutions, Inc. Hilliard, OH

16 ⁸ Department of Mechanical Engineering, University of Maryland, College Park, MD

17 **Justification for large number of authors:** Multidisciplinary and multi-national collaboration.

18 **Conflict of interest statement and source of funding:** Authors Johnson, Hibino, Krieger are
19 inventors on US Patent App 62/209,990, which is related to this work. The work is supported in
20 part by NIH/NICHD R21HD090671. The graft materials were provided by Nanofiber Solutions.
