Exercise increases circulating GDF15 in humans

Maximilian Kleinert, Christoffer Clemmensen, Kim A. Sjøberg, Christian Strini Carl, Jacob Fuglsbjerg Jeppesen, Jørgen F.P. Wojtaszewski, Bente Kiens, Erik A. Richter

PII: S2212-8778(17)30925-0

DOI: [10.1016/j.molmet.2017.12.016](https://doi.org/10.1016/j.molmet.2017.12.016)

Reference: MOLMET 599

To appear in: *Molecular Metabolism*

Received Date: 14 November 2017

Revised Date: 4 December 2017

Accepted Date: 6 December 2017

Please cite this article as: Kleinert M, Clemmensen C, Sjøberg KA, Carl CS, Jeppesen JF, Wojtaszewski JFP, Kiens B, Richter EA, Exercise increases circulating GDF15 in humans, *Molecular Metabolism* (2018), doi: 10.1016/j.molmet.2017.12.016.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
