**Running title:** Oxygen therapy after arrest

**Word count:** 1286

**References:** 15

**Keywords:** post-cardiac arrest syndrome, oxygen, reperfusion injury

Following resuscitation from cardiac arrest, a complex set of overlapping pathophysiologic pathways are triggered, often described as post-cardiac arrest syndrome (PCAS).<sup>1</sup> This condition, commonly observed within hours following return of spontaneous circulation, has a highly variable time course and severity. In many post-arrest patients, PCAS contributes
