

## Accepted Manuscript

Title: Association of hemodynamic variables with in-hospital mortality and favorable neurological outcomes in post-cardiac arrest care with targeted temperature management

Authors: Chien-Hua Huang, Min-Shan Tsai, Hooi Nee Ong, Weiting Chen, Chih-Hung Wang, Wei-Tien Chang, Tzung-Dau Wang, Shyr-Chyr Chen, Matthew Huei-Ming Ma, Wen-Jone Chen

PII: S0300-9572(17)30290-3  
DOI: <http://dx.doi.org/doi:10.1016/j.resuscitation.2017.07.009>  
Reference: RESUS 7242

To appear in: *Resuscitation*

Received date: 24-4-2017  
Revised date: 17-6-2017  
Accepted date: 9-7-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Association of hemodynamic variables with in-hospital mortality and favorable neurological outcomes in post-cardiac arrest care with targeted temperature management**
