This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TITLE: A new microscopic insight into the thrombogenicity of umbilical catheters

Alina Sobczak MD¹, Piotr Kruczek MD PhD¹, Marta Homa PhD², prof. Przemko Kwinta MD PhD^{1*}

¹Neonatal Intensive Care Unit, Department of Pediatrics, Jagiellonian University Medical College, Kraków, Poland

²Centre for High Temperature Studies, Foundry Research Institute, Kraków, Poland

* Corresponding author: prof. Przemko Kwinta, University Children's Hospital, ul. Wielicka 265, 30-663 Kraków – Poland; tel: +48 12 333 90 36, przemko.kwinta@uj.edu.pl

other authors: alina.sobczak@uj.edu.pl, piotr.kruczek@uj.edu.pl, marta.homa@iod.krakow.pl

The research was funded by the National Science Centre, Poland as a part of the project no. 2016/21/N/NZ5/01442 entitled „A new microscopic insight into the thrombogenicity and other complications of umbilical catheters use” and performed in the frame of the collaboration agreement.

Key words: umbilical catheters, thrombosis, central catheter, adverse effects, neonatal intensive care unit, prematurity
