This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Diagnosing Spontaneous Coronary Artery Dissection in Women:

A Call for Early Coronary Angiography

Jane A. Leopold, MD

Brigham and Women's Hospital, Harvard Medical School

Boston, MA

ACKNOWLEDGEMENTS:

This work was supported by NIH/NHLBI U01 125215

DISCLOSURES:

None

Word count: 1,511

Key Words: coronary angiography, spontaneous coronary artery dissection, women
