This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Biology and clinical relevance of non-coding sno/scaRNAs

Thuy Cao, BS,^a Sheeja Rajasingh, MSc, MPhil^a, Saheli Samanta, PhD^a, Buddhadeb Dawn, MD^a, Douglas C. Bittel, PhD^b, and Johnson Rajasingh, PhD^{a,c}★

Short title: Clinical relevance of non-coding scaRNAs**Acknowledgements**

This work was supported, in part, by American Heart Association Grant-in-Aid 16GRNT30950010 and National Institutes of Health COBRE grant P20GM104936 (to JR).

Author Contributions: Thuy Cao, Saheli Samanta wrote the article; Thuy Cao, and Sheeja Rajasingh contributed in drawing figures; Buddhadeb Dawn and Douglas C. Bittel helped in editing the manuscript; Johnson Rajasingh provided valuable insights about non-coding RNA biology as well as conceptual advice and helped writing the manuscript.

Conflicts of Interest: The authors declare no conflict of interest.
