Title: Association of Hippocampal Substructure Resting-State Functional Connectivity with Memory Performance in Older Adults

Author: Stephen F. Smagula, Helmet T. Karim, Anusha Rangarajan, Fernando Pasquini Santos, Sossena C. Wood, Tales Santini, John M. Jakicic, Charles F. Reynolds III, Judy L. Cameron, Abbe N. Vallejo, Meryl A. Butters, Caterina Rosano, Tamer S. Ibrahim, Kirk I. Erickson, Howard J. Aizenstein

PII: S1064-7481(18)30260-4
DOI: <https://doi.org/10.1016/j.jagp.2018.03.003>
Reference: AMGP 1016

To appear in: *The American Journal of Geriatric Psychiatry*

Received date: 16-1-2018
Revised date: 28-2-2018
Accepted date: 6-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Association of hippocampal substructure resting-state functional connectivity with memory performance in older adults
