This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Update on the Risk of Motor Vehicle Collision or Driving Impairment with Dementia: A Collaborative International Systematic Review and Meta-Analysis

Author Disclosures:

Several of the authors have publications on the topic that were included as part of the review. To mitigate the associated risk, the authors were not involved in the screening or data extraction of their own publications (MJR, DBC, SC, NH, JD, JC, SM, JPT, JD, KO). Several co-authors disclosed research grants/funding for their work (MJR, DBC, SC, NH, JD, JC, KL, SM, FM). Potential COIs were declared by MJR (Canadian Academy of Geriatric Psychiatry (CAGP) board president; consultancy at the Canadian Medical Association(CMA)), DBC (board membership for Memory Care Home Solutions, Dementia Organization, and the Advocacy Committee for the Alzheimer's Association; consultancies at ADEPT, MEDSCAPE, Traffic Injury Research Foundation, and AAA Foundation for Traffic Safety; legal cases on medical conditions and driving), SC (honouraria from National Institutes of Health (NIH) and Canadian Association of Occupational Therapy (CAOT)), NH (research support from Lundbeck and Roche; consultancies at AbbVie, Astellas, and Merck; honouraria from Pfizer, Lundbeck, and Novartis), JC (board membership for BrainLink; consultancies at the Royal College of Physicians of Ireland, and National Transportation Commission), SM (consultancies at the CMA, the Ministry of Transportation of Ontario (MTO), and from physicians; expert testimony on TBI; honouraria for peer-reviewed speaking activities), and FM (consultancy at the CMA). All other authors have no disclosures.

Sources of Support:

This knowledge synthesis was funded by the Canadian Institutes of Health Research (CIHR) (KRS Grant #339665). The funders played no role in the study methodology, interpretation of results, preparation of the manuscript, or the process of disseminating this work. They accept no responsibility for the contents.

KEY WORDS: Dementia; Alzheimer's Disease; Driving; Neurology
