Keywords: MCI

Conflicts of interests: Over the last three years, Henry Brodaty has been on advisory boards of or a consultant to Eli Lilly, Merck and Nutricia. His department has received payment to participate in drug trials for Alzheimer's disease by Merck, Sanofi, Servier, Eli Lilly and Tau Therapeutics. He has been recipient of grants for research by the National Health and Medical Research Council and Australian Department of Health and Ageing. The other authors declare no competing interests.

Funding/Support: The work was supported by an Australian National Health and Medical Research Council Program Grant (ID1093083). HB and LA are supported by the Australian National Health and Medical Research Council-funded Dementia Collaborative Research Centre Assessment and Better Care at University of New South Wales. **Role of the Funder/Sponsor:** The funding sources had no role in the design and conduct of the study; collection, management, analysis, or interpretation of the data; preparation, review, or approval of the manuscript; and decision to submit the manuscript for publication.
