Post-operative deep brain stimulation assessment: Automatic data integration and report generation

Andreas Husch, Mikkel V. Petersen, Peter Gemmar, Jorge Goncalves, Niels Sunde, Frank Hertel

PII: S1935-861X(18)30060-3

DOI: [10.1016/j.brs.2018.01.031](https://doi.org/10.1016/j.brs.2018.01.031)

Reference: BRS 1185

To appear in: *Brain Stimulation*

Received Date: 23 October 2017

Revised Date: 23 January 2018

Accepted Date: 26 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Post-Operative Deep Brain Stimulation Assessment: Automatic Data Integration and Report Generation

Andreas Husch^{1,2}, Mikkel V. Petersen³, Peter Gemmar², Jorge Goncalves², Niels Sunde⁴, Frank Hertel^{1,2}

Highlights

- Fully automatic DBS report generation method is proposed
- Method is estimating individual deep brain structure anatomy
- Automatically reconstructing DBS lead
- Integrating neuroanatomical information with lead data
- Generating report as easy to use PDF file with embedded 3d objects
