Test-retest reliability of transcranial magnetic stimulation EEG evoked potentials

Lewis J. Kerwin, Corey J. Keller, Wei Wu, Manjari Narayan, Amit Etkin

PII: S1935-861X(17)31026-4

DOI: [10.1016/j.brs.2017.12.010](https://doi.org/10.1016/j.brs.2017.12.010)

Reference: BRS 1168

To appear in: *Brain Stimulation*

Received Date: 15 July 2017

Revised Date: 21 December 2017

Accepted Date: 27 December 2017

Please cite this article as: Kerwin LJ, Keller CJ, Wu W, Narayan M, Etkin A, Test-retest reliability of transcranial magnetic stimulation EEG evoked potentials, *Brain Stimulation* (2018), doi: 10.1016/j.brs.2017.12.010.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Test-Retest Reliability of Transcranial Magnetic Stimulation EEG Evoked Potentials

Running title: Test-Retest Reliability of TEPs

To be submitted:

Number of pages: 24

Number of figures: 6

Number of tables: 2

Abstract word count: 249

Intro word count: 761 w/citations

Discussion word count: 1042 w/citations

Intro-to-Discussion word count: 4342 w/ citations

Running title: Test-Retest Reliability of TEPs

Keywords: Transcranial magnetic stimulation (TMS), electroencephalogram (EEG), evoked potentials, reliability, plasticity

Funding: This work was funded by Big Idea in Neuroscience research funds from the Stanford Neurosciences Institute. LJK was funded by a Alpha Omega Alpha Carolyn L. Kuckein Student Research Fellowship.
