Altered Electrophysiological Correlates of Motor Inhibition and Performance Monitoring in Tourette's Syndrome

Thomas Schüller, Theo O.J. Gründler, René Huster, Juan Carlos Baldermann, Daniel Huys, Markus Ullsperger, Jens Kuhn

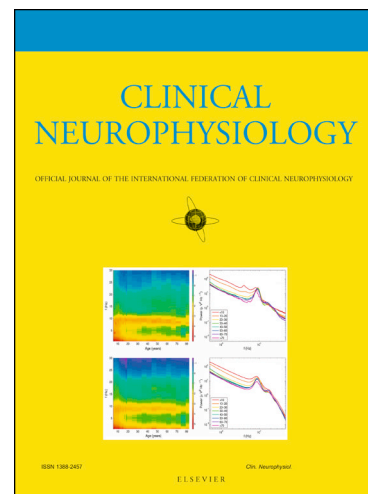

PII: S1388-2457(18)31104-0
DOI: <https://doi.org/10.1016/j.clinph.2018.06.002>
Reference: CLINPH 2008556

To appear in: *Clinical Neurophysiology*

Received Date: 9 March 2018
Revised Date: 9 May 2018
Accepted Date: 5 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Altered Electrophysiological Correlates of Motor Inhibition and Performance Monitoring in Tourette's Syndrome
