Behavioral and electrophysiological evidence for GABAergic modulation through transcutaneous vagus nerve stimulation

Marius Keute, Philipp Ruhnau, Hans-Jochen Heinze, Tino Zaehle

PII: S1388-2457(18)31118-0
DOI: <https://doi.org/10.1016/j.clinph.2018.05.026>
Reference: CLINPH 2008570

To appear in: *Clinical Neurophysiology*

Received Date: 25 January 2018
Revised Date: 13 April 2018
Accepted Date: 21 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Behavioral and electrophysiological evidence for GABAergic modulation through transcutaneous vagus nerve stimulation
