

## Accepted Manuscript

Sharply contoured theta waves are the human correlate of ponto-geniculo-occipital waves in the primary visual cortex

Birgit Frauscher, Sweta Joshi, Nicolas von Ellenrieder, Dang Khoa Nguyen, François Dubeau, Jean Gotman

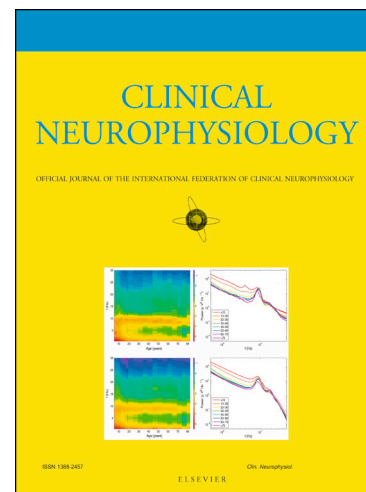

PII: S1388-2457(18)30908-8

DOI: <https://doi.org/10.1016/j.clinph.2018.04.605>

Reference: CLINPH 2008512

To appear in: *Clinical Neurophysiology*

Accepted Date: 4 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Sharply contoured theta waves are the human correlate of ponto-geniculo-occipital waves  
in the primary visual cortex**
