

## Accepted Manuscript

Estimation of voluntary elicited motor neuron discharge using a peripheral nerve collision technique at different contraction strengths

Olivier Scheidegger, Nicole Kamber, Kai Michael Rösler

PII: S1388-2457(18)31080-0

DOI: <https://doi.org/10.1016/j.clinph.2018.04.751>

Reference: CLINPH 2008532

To appear in: *Clinical Neurophysiology*

Accepted Date: 25 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Estimation of voluntary elicited motor neuron discharge using a peripheral nerve collision technique at different contraction strengths**

Olivier Scheidegger (\*), Nicole Kamber (\*), Kai Michael Rösler

Department of Neurology, Inselspital, Bern University Hospital, and University of Bern, Switzerland

(\*). Both authors contributed equally to the manuscript.
