Oxaliplatin and neuropathy: A role for sodium channels

Susanna B. Park, Matthew C. Kiernan

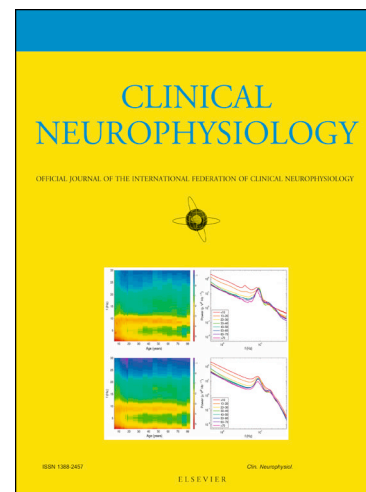

PII: S1388-2457(17)31215-4

DOI: <https://doi.org/10.1016/j.clinph.2017.12.028>

Reference: CLINPH 2008376

To appear in: *Clinical Neurophysiology*

Accepted Date: 19 December 2017

Please cite this article as: Park, S.B., Kiernan, M.C., Oxaliplatin and neuropathy: A role for sodium channels, *Clinical Neurophysiology* (2017), doi: <https://doi.org/10.1016/j.clinph.2017.12.028>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Oxaliplatin and neuropathy: a role for sodium channels
