Ultrasound and MRI of nerves for monitoring disease activity and treatment effects in chronic dysimmune neuropathies – current concepts and future directions

Bernhard F. Décard, Mirko Pham, Alexander Grimm

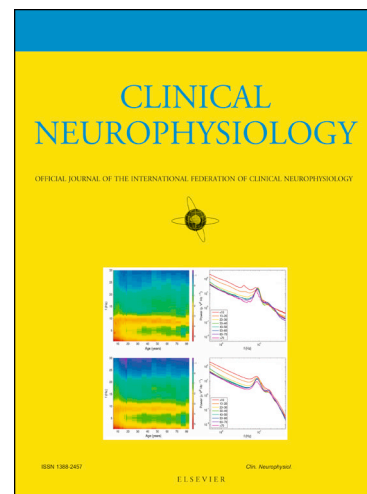

PII: S1388-2457(17)31123-9

DOI: <https://doi.org/10.1016/j.clinph.2017.10.028>

Reference: CLINPH 2008319

To appear in: *Clinical Neurophysiology*

Accepted Date: 7 October 2017

Please cite this article as: Décard, B.F., Pham, M., Grimm, A., Ultrasound and MRI of nerves for monitoring disease activity and treatment effects in chronic dysimmune neuropathies – current concepts and future directions, *Clinical Neurophysiology* (2017), doi: <https://doi.org/10.1016/j.clinph.2017.10.028>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Ultrasound and MRI of nerves for monitoring disease activity and treatment effects in chronic dysimmune neuropathies – current concepts and future directions
