

## Accepted Manuscript

Bilateral early activity in the hip flexors associated with Falls in Stroke Survivors: Preliminary evidence from laboratory-induced falls

Dmitrijs Celinskis, Mark D. Grabiner, Claire F. Honeycutt

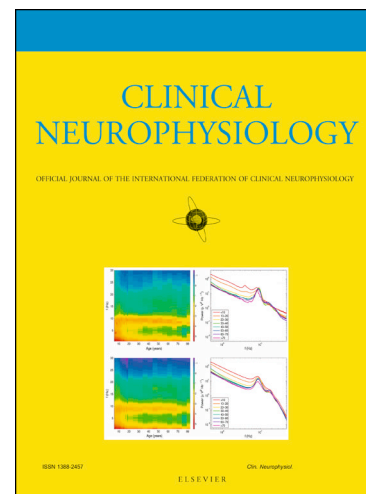

PII: S1388-2457(17)31152-5

DOI: <https://doi.org/10.1016/j.clinph.2017.11.005>

Reference: CLINPH 2008337

To appear in: *Clinical Neurophysiology*

Accepted Date: 2 November 2017

Please cite this article as: Celinskis, D., Grabiner, M.D., Honeycutt, C.F., Bilateral early activity in the hip flexors associated with Falls in Stroke Survivors: Preliminary evidence from laboratory-induced falls, *Clinical Neurophysiology* (2017), doi: <https://doi.org/10.1016/j.clinph.2017.11.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Bilateral early activity in the hip flexors associated with Falls in Stroke Survivors:  
preliminary evidence from laboratory-induced falls**

<sup>b</sup> *Department of Kinesiology and Nutrition, University of Illinois at Chicago, USA*

\* *Corresponding author. Address: School of Biological and Health Systems Engineering, Arizona State University, 501 E Tyler Mall, Rm 334, PO Box 879709, Tempe, Arizona 85287-9709, USA. Tel.: +1 480 9658453. E-mail address: Claire.Honeycutt@asu.edu.*

**Acknowledgments**

The authors would like to thank Mackenzie Pater, Noah Rosenblatt, Paul Marqui for help with data collection and design, as well as Masood Nevisipour for help with kinematic data analysis.

**Sources of Funding**

This work was supported by the National Institutes of Health grant K99/R00 HD073240.

**Conflict of Interest**

University of Illinois at Chicago owns a patent on some technology used in the ActiveStep treadmill system and consequently there is an institutional conflict of interest.

Mark D. Grabiner is an inventor of the ActiveStep system but has no conflicts of interest to declare with regard to the present study.
