Effect of early embryonic deletion of huntingtin from pyramidal neurons on the development and long-term survival of neurons in cerebral cortex and striatum

I. Dragatsis, P. Dietrich, H. Ren, Y.P. Deng, N. Del Mar, H.B. Wang, I.M. Johnson, K.R. Jones, A. Reiner

PII: S0969-9961(17)30299-1
DOI: <https://doi.org/10.1016/j.nbd.2017.12.015>
Reference: YNBDI 4087
To appear in: *Neurobiology of Disease*
Received date: 28 March 2017
Revised date: 7 November 2017
Accepted date: 19 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of Early Embryonic Deletion of Huntingtin from Pyramidal Neurons on the Development and Long-term Survival of Neurons in Cerebral Cortex and Striatum

Short Title: Embryonic Cortical Huntingtin Deletion
