ANKRD11 associated with intellectual disability and autism regulates dendrite differentiation via the BDNF/TrkB signaling pathway

Minhan Ka, Woo-Yang Kim

PII: S0969-9961(17)30293-0
DOI: <https://doi.org/10.1016/j.nbd.2017.12.008>
Reference: YNBDI 4080
To appear in: *Neurobiology of Disease*
Received date: 27 July 2017
Revised date: 29 November 2017
Accepted date: 19 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: ANKRD11 associated with intellectual disability and autism regulates dendrite differentiation via the BDNF/TrkB signaling pathway

Minhan Ka and Woo-Yang Kim*

Department of Developmental Neuroscience, Munroe-Meyer Institute, University of Nebraska Medical Center, Omaha, NE 68198

* Corresponding author

Running title: ANKRD11 in dendrite and spine differentiation

Keywords: ANKRD11; dendrite; arborization; dendritic spine; TrkB; BDNF; histone acetylation; autism; intellectual disability
