This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A cortical substrate for the long-term memory of saccadic eye movements calibration

Abbreviated title: **Retention of saccadic adaptation**

Denis Pélisson^{1*}, Ouazna Habchi¹, Muriel T.N. Panouillères², Charles Hernoux¹, and Alessandro Farnè¹

Number of pages: 20

Number of Figures: 8

Number of Tables: 1

Number of words: Abstract (222), Introduction (615), Discussion (1817)

Conflict of Interest: The authors declare no competing financial interests.

Acknowledgments:

This work was funded by FRM, the James S. McDonnell Foundation, and the LABEX CORTEX (Grant ANR-11-LABX- 0042) of University of Lyon, within the Investments in the Future Program (Grant ANR-11-IDEX-0007) operated by the French National Research Agency. We thank Elvio Blini for advices on statistics and all subjects for their participation in this study.

Author contributions: D.P., O.H. and A.F. designed research; O.H. and C.H. performed research; O.H. and D.P. analyzed data; D.P., M.T.N.P. and A.F. wrote the paper.
