This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Functionally separated networks for self-paced and externally-cued motor execution in Parkinson's disease: evidence from deep brain recordings in humans

Oliver Bichsel^{1,2,3}, Roger Gassert¹, Lennart Stieglitz^{3,4}, Mechthild Uhl^{2,3}, Heide Baumann-Vogel^{2,3}, Daniel Waldvogel^{2,3}, Christian R. Baumann^{2,3,*}, Lukas L. Imbach^{2,3,*}
