Diffusion tensor image segmentation of the cerebrum provides a single measure of cerebral small vessel disease severity related to cognitive change

Owen A. Williams, Eva A. Zeestraten, Philip Benjamin, Christian Lambert, Andrew J. Lawrence, Andrew D. Mackinnon, Robin G. Morris, Hugh S. Markus, Rebecca A. Charlton, Thomas R. Barrick

PII: S2213-1582(17)30205-X
DOI: doi: [10.1016/j.nicl.2017.08.016](https://doi.org/10.1016/j.nicl.2017.08.016)
Reference: YNICKL 1116
To appear in: *NeuroImage: Clinical*
Received date: 10 February 2017
Revised date: 5 July 2017
Accepted date: 12 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Diffusion Tensor Image Segmentation of the Cerebrum Provides a Single Measure of Cerebral Small Vessel Disease Severity Related to Cognitive Change
