

# Accepted Manuscript

Title: Progressive fat replacement of muscle contributes to the disease mechanism of patients with single, large-scale deletions of mitochondrial DNA

Author: Gitte Hedermann, Julia R. Dahlqvist, Nicoline Løkken, Christoffer R. Vissing, Kirsten Lykke Knak, Linda Kahr Andersen, Carsten Thomsen, John Vissing

PII: S0960-8966(17)31330-5  
DOI: <https://doi.org/10.1016/j.nmd.2018.02.008>  
Reference: NMD 3518

To appear in: *Neuromuscular Disorders*

Received date: 27-9-2017  
Accepted date: 13-2-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Progressive fat replacement of muscle contributes to the disease

2 mechanism of patients with single, large-scale deletions of mitochondrial

3 DNA
