Financial disclosures: The authors have no financial relationships relevant to this article to disclose.

Conflict of Interest: The authors have no conflicts of interest to disclose.

This article was prepared while Adam L. Hartman, MD was employed at Johns Hopkins University. The opinions expressed in this article are the author's own and do not reflect the view of the National Institutes of Health, the Department of Health and Human Services, or the United States government.

Short Title: Survey of seizure management in HIE

Word Count: 2,281

Abstract:

Objective: Seizures occur commonly in neonates and growing evidence suggests they

may cause added harm in neonates with hypoxic ischemic encephalopathy (HIE).

However, specific recommendations about when and how to treat seizures in this

context are lacking. The objective of this study was to determine the scope of practice
