This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Burden of skin cancer in Belgium and cost-effectiveness of primary prevention by reducing ultraviolet exposure

Keywords: Skin cancer, primary prevention, cost-effectiveness, cost-of-illness, Markov model

Authors

Lore Pil¹, Isabelle Hoorens^{*2}, Katrien Vossaert³, Vibeke Kruse⁴, Isabelle Tromme⁵, Niko Speybroeck⁶, Lieve Brochez ^{**2} and Lieven Annemans^{**1}

Author affiliations and acknowledgements

* L. Pil, & I. Hoorens made equal contributions in this study

** L. Brochez & L. Annemans made equal contributions in this study

¹ Department of Public Health, Ghent University, Ghent, Belgium

² Department of Dermatology, University Hospital Ghent, Ghent, Belgium

³ Private practice, Maldegem, Belgium
