ABSTRACT Premature ovarian insufficiency (POI) effect seriously on physical and mental health of the patients. Studies show that acupuncture may be promising in treating POI, yet evidence is insufficient. International patient registry, one form of observational study, is designed for evaluating effectiveness and safety of acupuncture in real-world clinical settings. We will face a series of opportunities and challenges. The opportunities are as follows: (1) Interdisciplinary cooperation can improve the effect of acupuncture for POI. (2) The protocol for acupuncture to
