<ABS-HEAD>Highlights ► We investigated the pathogenesis of erosive OLP via urinary  
metabonomic study. ► Multiple pathways and pathological processes were involved in erosive  
OLP. ► The dysregulations of metabolites can be used to explain the pathogenesis of erosive OLP.

<ABS-HEAD>Abstract

<ABS-P>

<ABS-P><ST>Objective</ST>: Oral lichen planus (OLP) is a relatively common chronic  
immune-pathological and inflammatory disease and potentially oral precancerous lesion. Erosive
