This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Review Analysis and Evaluation

### DECLARATIVE TITLE:

LIMITED LONGITUDINAL EVIDENCE SUGGESTS THAT SOCIOECONOMIC POSITION MAY INFLUENCE PERIODONTAL DISEASES OVER THE COURSE OF LIFE

**REVIEWERS:** Luisa N. Borrell, Sharon P. Joseph

**PURPOSE/QUESTION:** The authors systematically reviewed longitudinal studies investigating the influence of individual-level socioeconomic position (SEP) early in life on subsequent periodontitis in adulthood.

**ARTICLE TITLE AND BIBLIOGRAPHIC INFORMATION:** *Socioeconomic position during life and periodontitis in adulthood: a systematic review.* **Schuch HS, Peres KG, Singh A, Peres MA, Do LG.** *Community Dent Oral Epidemiol* 2017;45(3):201-8.

### Strength of Recommendation Taxonomy (SORT) Grading

#### STRENGTH OF RECOMMENDATION GRADE:

*Grade B*                      *Inconsistent or limited-quality patient-oriented evidence*

#### LEVEL OF EVIDENCE:

*Level 2*                      *Limited-quality, patient-oriented evidence*

#### SOURCE OF FUNDING:

*Brazilian Government Agency – CAPES: Coordination for the Improvement of Higher Education Personnel for the PhD Scholarship (HSS- Process 13374-13-1)*

#### TYPE OF STUDY/DESIGN:

*Systematic review*

#### KEY WORDS:

*Education, Income, Wealth, Periodontal diseases, Longitudinal studies, Socioeconomic indicators*
