21
22 Key words: food protein-induced enterocolitis, FPIES, cow's milk, food allergy,
23 breast milk.

24
25
26
27
28 Food protein-induced enterocolitis syndrome (FPIES) is a non-IgE mediated
29 gastrointestinal food hypersensitivity, characterized by profuse vomiting,
30 frequently associated to pallor or/and lethargy that appears within 1 to 3 hours
31 after ingestion of the offending food. Severe cases with protracted emesis
32 develop dehydration, hypotension and acidosis.
