Title: Angioedema: systemic activation process during prodromes

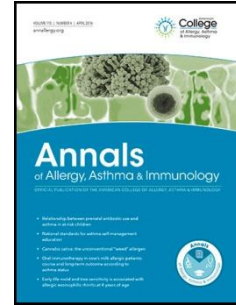

Author: Samuel Luyasu, Delphine Charignon, Denise Ponard, Christian Drouet, Arije Ghannam

PII: S1081-1206(18)30333-8

DOI: <https://doi.org/10.1016/j.anai.2018.04.026>

Reference: ANAI 2543

To appear in: *Annals of Allergy, Asthma & Immunology*

Please cite this article as: Samuel Luyasu, Delphine Charignon, Denise Ponard, Christian Drouet, Arije Ghannam, Angioedema: systemic activation process during prodromes, *Annals of Allergy, Asthma & Immunology* (2018), <https://doi.org/10.1016/j.anai.2018.04.026>.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

16 **Conflicts of interest**

17 DC and AG currently receive financial support from KininX SAS. The other authors declare
18 that they have no competing financial interests.

19

20 **Funding**

21 This work was supported by an ERA-Net E-RARE-1 research program within the framework
22 of the “Genetics, Pathophysiology, and Therapy of Hereditary Angioedema Type III”
23 project. The funders had no role in the study design, data collection, data analyses, decision to
24 publish, or preparation of the manuscript.

25 All procedures were performed according to the principles of the Helsinki Declaration and
26 French ethical policies. Study ethics approval was obtained on 14 December 2017 (CECIC
27 Rhône-Alpes-Auvergne, Clermont-Ferrand, IRB 5891). The research program was registered
28 by the ANSM, the French National Agency for Medicines and Health Products Safety, under
29 ID number 2009-A00025-52.
