This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Recurrent Wheezing in Children Following Human Metapneumovirus Infection**

2

3 **Authors:** Andrea M. Coverstone, MD¹, Bradley S. Wilson, MA², Dana Burgdorf, RN³, Kenneth
4 B. Schechtman, PhD², Gregory A. Storch, MD¹, Michael J. Holtzman, MD³, Mario Castro, MD,
5 MPH³, Leonard B. Bacharier, MD^{1*} and Kaharu Sumino, MD, MPH^{3*}

6

7 **Author Affiliations:** ¹Division of Allergy, Immunology and Pulmonary Medicine, Department
8 of Pediatrics, ²Division of Biostatistics, Department of Medicine, ³Division of Pulmonary and
9 Critical Care Medicine, Department of Medicine, Washington University School of Medicine,
10 Saint Louis, MO, USA.

11 *Drs Bacharier and Sumino contributed equally to this work.

21

22 **Funding:**

23 This work was supported by National Institute of Health [1KM1CA156708-1 to KS], the
24 National Institute of Allergy and Infectious Diseases [U19 AI070489], and the National Center
25 for Advancing Translational Sciences [5UL1 TR000448-07].

26 **Word Count:** 1311

27

28 **Capsule Summary:**

29 We showed that early in life human metapneumovirus infection is associated with increased risk
30 of subsequent wheezing episodes.

31

32 **Key Words:**

33 Human metapneumovirus; Wheezing; Asthma
