Please cite this article as: Ohn J, Eun SJ, Kim D-Y, Park H-s, Cho S, Yoon H-S, Misclassification of Study Designs in the Dermatology Literature, *Journal of the American Academy of Dermatology* (2017), doi: 10.1016/j.jaad.2017.10.049.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Capsule summary

- Little is known about whether study designs have been appropriately reported in the dermatology literature.
- Substantial discrepancies were found between author-reported and actual study designs, particularly for observational studies.
- The study designs predominantly used in the dermatology field are limited, and their misclassification can be easily addressed.
