Lack of correlation of the patient derived vitiligo disease activity index (VIDA) with the clinician derived vitiligo activity severity index (VASI)

Jennifer Coias, BA, Linda S. Hynan, PhD, Amit G. Pandya, MD

PII: S0190-9622(17)32733-0

DOI: [10.1016/j.jaad.2017.11.034](https://doi.org/10.1016/j.jaad.2017.11.034)

Reference: YMJD 12138

To appear in: *Journal of the American Academy of Dermatology*

Received Date: 2 August 2017

Revised Date: 9 November 2017

Accepted Date: 12 November 2017

Please cite this article as: Coias J, Hynan LS, Pandya AG, Lack of correlation of the patient derived vitiligo disease activity index (VIDA) with the clinician derived vitiligo activity severity index (VASI), *Journal of the American Academy of Dermatology* (2017), doi: 10.1016/j.jaad.2017.11.034.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Lack of correlation of the patient derived vitiligo disease activity index (VIDA) with**
2 **the clinician derived vitiligo activity severity index (VASI)**
